PORT OF RAUMA

Passenger Operations

- Passengers are not permitted to walk or cycle within the port area.
- Shuttle bus services and shore excursion transportation are arranged in advance.
- Visit Rauma coordinates destination services, shuttle buses and excursion transportation.

Drone Operations

- Drone flights require prior authorization from Port of Rauma.
- The permit application form: Photography and drone operation permit
- Drone operators and photographers must complete the Port of Rauma Safety Induction before operating in the port area.
- Safety Induction: <https://portofrauma.com/en/guidelines-and-safety/safety-induction/>
- Permit applications shall be sent to: juhani.laiho@portofrauma.com

Vessel Maintenance During Port Call

- Hull cleaning with fresh water and environmentally friendly detergents is permitted.
- Minor touch-up painting and the use of work pontoons are allowed. Ensure that the required personal protective equipment (PPE) is worn (such as inflatable life jackets, helmets, safety footwear and high-visibility clothing).
- Port Control must be informed before any such work commences.

Potable Water Supply

The latest available water quality report 11.3.2025 confirms good potable water quality. No E. coli, coliform bacteria or enterococci were detected.

Ship-Generated Waste Management

- If the waste containers are full, please contact the traffic supervisors, tel. +358 (0)500 597 579.
- Vessels found to have placed hazardous waste in containers provided for domestic waste or on some other location in the quay area, or found to have not sorted wastes correctly, are charged for the further processing of the waste (sorting, transport, disposal, etc.) according to the valid list of service charges of Port of Rauma.
- More about waste management in the port: <https://portofrauma.com/en/harbour-regulations/to-vessels/>
- Sorting instructions attached Appendix 2
